Frankfort, Kentucky

1986

This 22nd edition of the Kentucky Economic Statistics has been prepared by the Kentucky Department of Economic Development, Division of Research and Planning, and the cost of printing paid from state funds. Ronald Morgan, Branch Manager. Editor: Ronnie Decker; Clerical: Bobbi Graves; Graphics: Tony Cecconi, Robert Owens.

TABLE OF CONTENTS

KENTUCKY AND U.S. DATA

Population of Kentucky: 1930-1980 3

Total Private and Public Housekeeping Residential Construction, Kentucky and U.S.: 1980-1984 3

Total Value of Private Nonresidential Construction, Kentucky and U.S.: 1980-1984 3

The Consumer Price Index: 1968-1984 4

Unemployment Rate for Kentucky and U.S.: 1970-1984 5

Income and Poverty Status for Kentucky and U.S.: 1979 5

U.S. Weighted Average Poverty Thresholds: 1980 and 1984 6

Personal Income in Kentucky and U.S.: 1969-1984 7

Sources of Personal Income in Kentucky: 1979 and 1983 7

Nonagricultural Employment in Kentucky and U.S.: 1984 8

Kentucky Manufacturing Hours and Earnings: 1984 10

Kentucky Manufacturing Production: 1982 11

Cash Receipts from Farm Marketing in Kentucky: 1983 and 1984 12

Farm Income in Kentucky: 1981-1984 12

Mineral Production in Kentucky: 1984 13

AREA DEVELOPMENT DISTRICT DATA

Land Area, Population and Migration: 1980 and 1982 17

Population by Race: 1980 18

Population Projections: 1985-2020 19

Labor Force Characteristics of Residents: 1984 20

Total and Per Capita Personal Income: 1979 and 1983 21

COUNTY DATA

Land Area, Rank and County Seat: 1980 25

Population and Migration: 1980 and 1982 27

Population by Urban and Rural Areas: 1980 30

Population by Race: 1980 32

Male Population by Age: 1980 35

Female Population by Age: 1980 38

Percent of Population Below Poverty Level: 1979 41

Households and Persons in Households: 1980 44

Kentucky Population Projections: 1985-2020 47

Kentucky Projected Population Change: 1980-2010 50

TABLE OF CONTENTS (continued)

COUNTY DATA (Continued)

Labor Force Characteristics of Residents: 1984 51
Covered Nonagricultural Employment by Industry by Place of Work: 1984 54
Covered Manufacturing Employment by Industry by Place of Work: 1984 60
Total Covered Wages by Industry by Place of Work: 1984 66
Covered Average Weekly Wages by Industry by Place of Work: 1984 72
Sources of Personal Income: 1983 78
Total and Per Capita Personal Income: 1979 and 1983 84
Median Family Income Estimates for Non-Metropolitan Counties: 1985 87
Number of Banks and Total Deposits: 1984 89
Motor Vehicle Registrations: 1984 91
Selected Tax Data: 1983 94

METROPOLITAN STATISTICAL AREA (MSA) DATA

Metropolitan Statistical Areas 99
Population and Migration: 1980 and 1982 100
Number of Banks and Total Bank Deposits: 1980 and 1984 101
Estimates of Median Family Income: 1985 101
Total Personal Income: 1979 and 1983 102
Per Capita Personal Income: 1979 and 1983 102
Sources of Personal Income: 1983 103

CITY DATA

Population and Classification 107
Household Data: 1980 116

1--Value added by manufacture for 1982 is computed using inventory data reported at cost or market prior to any adjustment to LIFO cost. This uniform method is a change from prior years in which respondents were permitted to value their inventories using any generally accepted accounting method. Consequently, 1982 data for value added by manufacture are not comparable to prior year data.

*--Withheld to avoid disclosing data for individual companies.

MINERAL PRODUCTION IN KENTUCKY:[1] 1984[p]

Mineral	Quantity	Value
Clays[2] (thousand short tons)	719	$ 2,359,000
Coal (bituminous) (thousand short tons)	159,541	4,487,888,330
Natural Gas (thousand cubic feet)	66,179,000	104,570,154*
Petroleum (thousand 42-gallon barrels)	7,689	217,793
Sand and Gravel (thousand short tons)	6,510	15,620,000
Crushed Stone (thousand short tons)	36,300	126,500,000
Gem Stones	N/A	1,000
Combined value of cement, clay (ball clay, fire clay) (1983), and zinc	XX	115,219,000
TOTAL	XX	4,852,375,277

*--Well Head Value.

P--Preliminary. XX--Not Applicable. N/A--Not Available.

1--Nonfuel mineral production as measured by mine shipments, poles, or marketable production (including consumption by producers).

2--Excludes ball clay and fire clay; included with "Combined Value" figure.

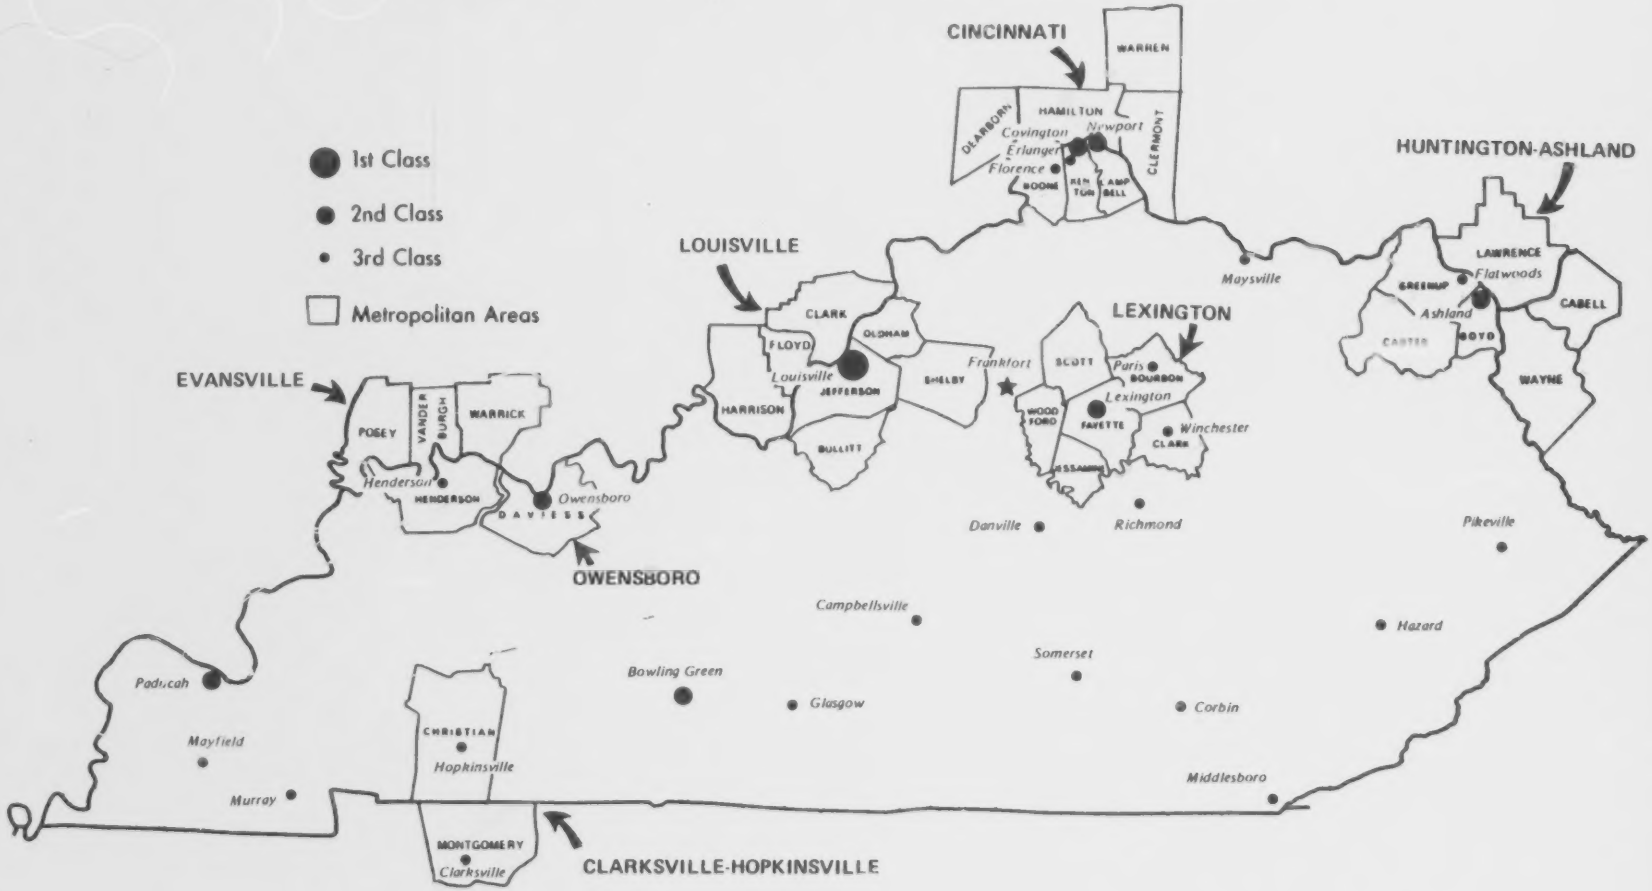
MSA DATA

METROPOLITAN STATISTICAL AREAS AND MAJOR KENTUCKY CITIES BY CLASS



NOTES:

1. On June 30, 1983 the term "Standard Metropolitan Statistical Area" was shortened to "Metropolitan Statistical Area" (MSA), and boundaries were adjusted;

   a. Evansville: deleted Gibson County, Indiana.
   b. Huntington-Ashland: added Carter County, Kentucky.
   c. Louisville: added Shelby County, Kentucky and Harrison County, Indiana.

2. Major Kentucky Cities include all 1st, 2nd, and 3rd class cities.

Note: Total persons in households and in group quarters based on preliminary population counts.
Source: University of Louisville, Urban Studies Center, State Data Center of Kentucky, Population and Households by Incorporated Places, Kentucky: 1980, Special Report No. 9.

DEFINITIONS

Titles and terms used in this publication are defined as below, unless indicated otherwise. For more detailed definitions and the methodology used to prepare the data, the original source for the data should be consulted. Users should exercise caution in comparing data for recent years with those of earlier years, because definitions are periodically revised by data generating agencies.

Area Development Districts: Official groupings of Kentucky counties into 15 multi-county regions for local, state, and federal program planning and administration. Boundaries of the districts were set by state legislation (KRS 147A.050) in 1972. Districts were formed from contiguous counties on the basis of economic ties, terrain, transportation networks, ease of administration, and other factors.

Cities: Municipalities charted or incorporated under the provisions of Kentucky laws. Kentucky cities are divided into six classes by the state constitution, on the basis of population. Each class of city has statutorily set minimum levels of governmental services. Since classifications are assigned to individual cities by state legislative action, some cities may be assigned to the wrong class until they are reclassified through legislation.

Class of City	Population
First	100,000 or More
Second	20,000 to 99,999
Third	8,000 to 19,999
Fourth	3,000 to 7,999
Fifth	1,000 to 2,999
Sixth	Less than 1,000

Civilian Labor Force: The sum of both employed and unemployed persons 16 years of age and older, excluding armed forces personnel and persons in penal and mental institutions, sanitariums, and homes for the aged, infirmed and needy. Persons "not in the labor force" are those not classified as employed or unemployed and include persons retired, those engaged in their own housework, those not working while attending school, those unable to work because of long-term illness, those discouraged from seeking work because of personal or job market factors, and those who are voluntarily idle.

Consumer Price Index: A measure of change, over time, in the prices paid at retail by U.S. consumers for a typical market basket of goods and services. The index is a number expressed in relation to a base year that has been assigned a value of 100. As an example, a price index of 116.3 for 1970, with 1967 = 100, shows that a typical market basket costing $100 in 1967 cost $116.30 in 1970.

Beginning in 1978, separate indexes were published for (1) all urban consumers, and for (2) urban wage earners and clerical workers. The Consumer Price Index for all urban consumers is based on the buying patterns of about 80% of the U.S. population and is the more widely used of the two indexes for calculating "cost of living" increases.

A consumer price index comparable to the U.S. consumer price index is not available for Kentucky or its communities.

County: The basic level of local government for all areas in Kentucky. The powers of the Commonwealth's 120 counties also encompass the territories of cities located within their boundaries.

County Seat: The community that serves as the center for the county government (Fiscal Court) and contains county offices and records. The county seat is the location of the county court house, but in some instances county offices are located at more than one community within the county.

Covered Employment: The numbers of persons employed in industries covered by state unemployment insurance. Generally, all workers are included except self-employed individuals, unpaid family members, some student workers, agricultural workers, domestic workers, railroad workers, employees of certain religious organizations, certain government employees, and others.

DEFINITIONS

Employment by Place of Residence: The numbers of employed persons whose usual place of residence is within the area designated, whether they work within the area or commute to jobs outside of the area. This type of job information is usually gathered by surveys at the workers' homes, as in the U.S. Census of Population.

Employment by Place of Work: The numbers of persons working at places within the area designated, whether they reside within the area or commute to their jobs from residences outside of the area. This type of job information is usually tabulated from reports made by individual employers, as with quarterly unemployment insurance reports to state government.

Family: A group of two or more persons living in the same household who are related by birth, marriage, or adoption. Excluded are single-person households and households composed of groups of unrelated individuals.

Group Quarters: Living quarters for persons not living in households. Examples of group quarters include military barracks, correctional institutions, college dormitories, fraternity and sorority houses, hospitals, nursing and convalescent homes, orphanages, religious missions, convents and monastaries, and communes. Areas with high proportions of their total populations living in group quarters usually have unusual age distributions, rates of births, marriages, and deaths, and other social and economic characteristics.

Household: All persons who occupy an individual housing unit. Occupants of a household may be one person living alone, a single family, two or more families, or any group of related or unrelated individuals.

Housing Units: A house, apartment, group of rooms, or single room where occupants live and eat separately from other persons in the building and have direct access from outside the building or from a common hall.

Industries: Classifications of private and public establishments by type of economic activity (establishments are economic units at single physical locations where business is conducted, or where services or industrial operations are performed). The groupings of industries in this publication are based upon the classifications published by the U.S. Office of Management and Budget in the "1972 Standard Industrial Classification Manual."

Land Area: The geographic size of land areas within the political boundaries of Kentucky and its counties, as published by the U.S. Bureau of the Census. Bodies of water and major streams are excluded, but the Bureau of the Census did not specify the minimum size of areas counted as water areas in its 1980 census of population.

Mean: The calculated average of a series of numbers, obtained by dividing the sum of all observations in the series by the number of observations.

Median: The value which divides a series of numbers "arranged in order of magnitude", so that one-half of all observations lie below it and one-half lie above it.

Metropolitan Statistical Area (MSA): Uniformly defined metropolitan areas, used for a wide variety of statistical programs. An MSA contains an urban nucleus of at least 50,000 population, along with adjacent counties which have a high degree of economic and social ties, for a total metropolitan population of at least 100,000 (75,000 in New England). The U.S. Office of Management and Budget designates MSA's and their boundaries, based on published official standards.

Larger metropolitan areas of over one million population and meeting certain criteria are classified as consolidated metropolitan statistical areas (CMSA's). Two or more primary metropolitan statistical areas (PMSA's) compose a CMSA.

Migration: The changing of a person's place of residence from one area to another.

Net migration, as reported by the U.S. Bureau of the Census and cooperating state population centers, is the residual of migration both into and out of an area during a specified period. It is derived by subtracting the natural increase (births, minus deaths) during the period from the change in the total population count during the same period.

DEFINITIONS

Non Metropolitan Areas: Areas outside the boundaries of officially designated metropolitan statistical areas (defined above).

Personal Income: Income received by "individuals" in an area. It includes income received from all sources, such as wages and salaries, other labor income (employer contributions to private pension funds, jury and witness fees, etc.), proprietor's income, rental income, dividend and interest earnings of individuals, transfer payments (primarily from government) not for services rendered, minus personal contributions for social insurance.

Personal income tabulations by industry group sources show income received by "individuals" from enterprises within industry groups and should not be construed as a measure of output for the industries.

Most components of personal income data are gathered on a place of work basis from employers or other sources. Final tabulations of total personal income, however, are adjusted to show the total personal income and personal income per capita for residents of state and local areas.

Poverty Level: The minimum level of money income adequate for families of different sizes, in keeping with American consumption patterns. The poverty thresholds for various sizes of families are adjusted annually by the U.S. government on the basis of an index originated at the U.S. Social Security Administration in 1964 and revised by federal interagency committees in 1969 and 1980.

Population Projections: The Kentucky population projections, as published by the Urban Studies Center at the University of Louisville, are based upon the component method of projections. The component method includes the calculation of the future population of an area by starting with the known population in a base year and applying assumed values over the projection period for the three components of population change: births, deaths, and migration. Since the rates of each of these components are subject to change, the projections are updated periodically to include latest base year data and updated component values.

Race: The race of individuals as defined by the U.S. Bureau of the Census for the 1980 census of population. Race reflected the self-identification of individuals responding to the census, and did not denote a scientific definition of biological stock. Households and families were classified by the race of the householder.

The category "white" includes those persons who identified themselves as white, along with those that identified themselves only with responses such as Canadian, German, Italian, Lebanese, or Polish.

"Black" includes those that identified themselves as black or negro, as well as those who identified themselves only with responses such as Jamaican, Black Puerto Rican, West Indian, Hatian, or Nigerian.

"American Indian, Eskimo, and Aleut" includes those persons who identifed themselves in one of these categories.

"Asian and Pacific Islander" includes those persons who indicated their race as Japanese, Chinese, Filipino, Korean, Vietnamese, Asian Indian, Hawaiian, Guamanian, or Somoan.

"Other" includes Asian and Pacific Islanders not listed separately (eg. Cambodian Laotian, Pakistani, Fiji Islander) and other races not specified in the census questionnaire. Also included in the other category were those persons who did not classify themselves in one of the specific race categories, but who wrote in entries such as Cuban, Puerto Rican, Mexican, or Dominican.

Residence: The place where a person lives and sleeps most of the time. This place is not necessarily the same as the person's legal residence or voting residence.

Rural Areas: Those areas outside of urban areas (see definition of urban areas, below).

Unemployment: A measure of those persons who are out of work and actively seeking a job. Unemployment is measured both in numbers of persons and as a percentage of the labor force.

Unemployment figures do not include those perons who are classified as discouraged workers (out of work and no longer seeking work) and who are no longer counted as being in the labor force.

Urban Population: All persons living in incorporated cities of 2,500 or more inhabitants, in census designated unincorporated places of 2,500 or more inhabitants, or in urbanized areas.

Urbanized Areas: Central cities and surrounding closely settled areas (urban fringe). The 1980 U.S. Census of Population defined an urbanized area to include an incorporated area and its adjacent densely settled area that together have a population of at least 50,000. Densely settled areas have incorporated places of at least 2,500 persons or a population density of at least 1,000 per square mile. Other criteria were used to tie other parts of the urban area into one unit.

Urban County: A Kentucky county containing a city with a population of at least 100,000 may merge city and county governments into an urban county government encompassing all areas within the county. The Lexington-Fayette Urban County was formed in 1974.

Value Added by Manufacture: A measure of the increased value of a product resulting from the manufacturing process. It is calculated by subtracting the cost of materials, supplies, energy, and labor from the value of shipments, and then adding the value added by any merchandising and net changes in inventories.

Value added by manufacture for 1982 is computed using data reported at cost or market prior to any adjustment to LIFO cost. This uniform method is a change from prior years in which respondents were permitted to value their inventories using any generally accepted accounting method. Consequently, 1982 data for value added by manufacture are not comparable to prior year data.

The use of value added by manufacture figures avoids the duplication of the value of shipments figures which result from the use of the output of some manufacturers as raw materials by other manufacturers. Value added is considered an important measure of the relative economic importance of manufacturing industries.

Value of Shipments: The net selling values of manufactured goods, F.O.B. plant, after discounts and allowances, and excluding freight charges and excise taxes. For products that are customarily delivered by the manufacturing establishments (bakery goods, dairy products, soft drinks, etc.) the value of shipments is based on the delivered price.
